

How to Install Cloudflare Turnstile CAPTCHA in WordPress

This guide explains how to install and set up Cloudflare Turnstile CAPTCHA on your WordPress site using the official plugin available at WordPress.org.

Plugin URL: <https://wordpress.org/plugins/simple-cloudflare-turnstile/>

1. Log into your WordPress admin dashboard.
2. Go to 'Plugins' > 'Add New' and search for 'Simple Cloudflare Turnstile'.
3. Click 'Install Now' and then 'Activate' the plugin.
4. In a new tab, go to <https://dash.cloudflare.com/> and log into your Cloudflare account.
5. Navigate to 'Turnstile' under the 'Security' section and click 'Add Site'.
6. Enter a name, domain (e.g., example.com), and choose the widget type (Managed is recommended).
7. Click 'Create', and copy the Site Key and Secret Key.
8. Return to your WordPress dashboard and go to 'Settings' > 'Cloudflare Turnstile'.
9. Paste your Site Key and Secret Key into the appropriate fields and save settings.
10. Enable Turnstile on the forms or pages you want (e.g., Contact Form 7, login, comments, etc.).
11. Test the form to ensure Turnstile CAPTCHA is functioning properly.
12. Optional: Monitor activity in your Cloudflare dashboard under 'Turnstile'.
